

On Wednesday, September 30th Sustainable Jersey in cooperation with Atlantic City Electric announced that Waterford Township was awarded a \$2500 Grant to move forward with a Feasibility Study for a dedicated 'Bike Path' between Thomas Richards and Ritter Recreation areas. This is the beginning of a project, that upon completion will offer our residents safer and easier access to these locations.

This Grant is the result of our Township's Committee, Recreation Committee and Environmental Commission working together for the benefit of our Community.
