

Municipal Utilities

The goal of the Water and Sewer Department is to provide our residents with the highest quality water resource which meets all State and Federal Requirements. We are also committed in providing outstanding service in a professional, courteous, and timely manner throughout the community, in the field, and our offices, with dignity and respect given to each customer's request. We ask that everyone joins us in protecting our natural water resource, which is the heart and soul of our community

Help Us Help You

Disposable Wipes – flushing disposal wipes, diapers feminine products and paper towels plug sewer lines. Cleaning wipes, sanitary wipes, paper towels, feminine products are designed to function when wet. These products normally do not break down in sewers and consequently plug sewer lines and mains. Avoid sewer backups by throwing these items in the trash. DO NOT throw them in the toilet.

Hydrant Flushing

Twice a year, during the Spring and Fall, the Utility Department flushes all of the hydrants throughout town. During and following flushing of the hydrants, residents may experience a temporary interruption of their service and/or discoloring of their water. Residents should simply run the faucet for approximately 30 seconds until the discoloration is gone. Residents will be notified prior to the flushing of the hydrants
